DOCUMENT ID: SORYE-OCR-2026-001

This is synthetic test data. No customer information is included.

Purpose: check extraction, math retention, storage and summary.

INVOICE: INV-TEST-1042 DATE: 2026-10-25

Supplier: Example Research Lab

Customer: Sorye Demo Workspace

Item	Quantity	Unit EUR	Total EUR
Optical sensor	3	40.00	120.00
Calibration service	2	30.00	60.00
Subtotal			180.00
Tax at 20 percent			36.00
Grand total			216.00

Payment due: 2026-11-08

PAGE-ONE-END-ALPHA

Mathematical expressions

Keep these expressions as source text. Do not silently rewrite.

ASCII notation is intentional for this extraction baseline.

```
3*40+2*30=180
180*0.20=36
180+36=216
x^2+2*x+1=(x+1)^2
E=m*c^2
v=120/2=60
p=3.14159*r^2
```

Units: distance in km, time in hours, speed in km/h.

The quadratic expression is an identity, not a measured result.

PAGE-TWO-END-BETA

Summary and verification

The lab supplied three optical sensors and two calibrations.
The invoice subtotal is EUR 180 and the tax is EUR 36.
The payable total is EUR 216, due on 2026-11-08.
The equations demonstrate arithmetic, powers and division.

Verify that stored rows contain all three page-end markers.
Verify that equations have MATH markers in the saved data.
Verify that the summary mentions the invoice and its total.
This PDF has selectable text. It does not test scanned images.
A summary may omit details; the saved rows should preserve them.
